Delivering Delicious Japanese Food to the World at Room Temperature

Green Design & Consulting proudly delivers Japanese sweet bread, cookies, and seasoned ready-to-eat rice that have garnered international acclaim, utilizing the retort processing technology honed over these past 20 years. Unlike products previously reliant on frozen export, our products can be transported at room temperature. Furthermore, with a shelf life of up to 7 years, they can be stored and sold at room temperature at import destinations. Customers who purchase our products can also store them at room temperature for long periods, making them readily available for consumption at any time.

Product Features:

- **Retort processing** allows for long-term storage at room temperature (no preservatives or alcohol used).
- **No cooking required** ; can be consumed as is.
- **Allergy friendly** ; free from 28 allergens.
- **Halal-certified.**
- **Multilingual support** (31 languages).

(*Some products containing wheat, milk, or meat are not suitable for allergies or halal consumption.)

Delivery Performance

Green Chemy Co., Ltd., the company entrusted with the manufacturing of our products, developed retort-processed cookies upon a request from the Ministry of Defense approximately 20 years ago. Subsequently, retort processing expanded to include cookies, bread, rice, side dishes, and more. Since 2016, in collaboration with our company, we have been supplying products as a 7-year preservable emergency food source to various entities, including government agencies such as the Ministry of Defense and the Ministry of Foreign Affairs, 347 municipalities nationwide, thousands of corporations, airports like Haneda and Narita, large facilities such as the National Stadium used for the Olympics and baseball stadiums, educational institutions ranging from kindergartens to universities, hospitals, welfare facilities, private companies across Japan, and even automobile manufacturers.
